January

After a difficult period of pandemic, today took place the first monitoring visit of the RiskMan project "Educational Capacity Strengthening for Risk Management of Non-native Aquatic Species in the Western Balkans".

This visit took place online, through the TIMS application, with NEO participants and project partners.

This project is one of the winning projects of 2020. The main aim of RiskMan Project is to strengthen the Educational Capacity for Risk Management of NN Aquatic Species in Albania, Bosnia and Herzegovina, Montenegro by promoting the education of stakeholders and higher education students and stimulating cooperation among the Partner countries.

Wishing you success in ongoing work.

February 23, 2021

Erasmus+/Key Action 2: Cooperation for innovation and the exchange of good practices, make it possible for organizations from different participating countries to work together, to develop, share and transfer best practices and innovative approaches in the fields of education, training and youth.

JOINT PROJECT title:

"Educational Capacity Strengthening for Risk Management of Non-native Aquatic Species in Western Balkans (Albania, Bosnia and Herzegovina and Montenegro) / RiskMan"

Duration: 2 years (15/11/2020 – 15/11/22)

Action: Capacity Building in Higher Education (CBHE)

Project summary: The main aim of RiskMan Project is to strengthen the Educational Capacity for Risk Management of Non Native Aquatic Species in the Western Balkan Region (Albania, Bosnia and Herzegovina, Montenegro) by promoting the education of stakeholders and higher education students and stimulate cooperation among the target countries.

It will focus on targets such as "improving the quality of higher education, developing new and innovative education programs, modernizing higher education systems". The project outputs, which is a historical step in determining the future education / training vision in higher education, are expected to have a great impact on the international science arena.

The target groups in each Partner Country (Albania, Bosnia and Herzegovina and Montenegro) include on a national level the academicians, teachers, tutors and non-educators from the high school and higher education institutions, employees from the operators of fisheries in the region, pupils from different high schools, general public as well as representatives from national organizations, enterprises, Agency of Environment, ministries (Ministry of Tourism and Environment and Ministry of Agriculture and Rural Development) and other public or private institutions working on the Aquatic Environmental Protection and Biodiversity Conservation.

Specifically, Universities, NGOs and research institutes of the target countries working on Aquatic Environmental,

University College of Business require a capacity building to create a bridge between the scientific community with the fisheries and aquaculture industry sectors, with the decision makers and also the citizens

Kolegji Universitar i Biznesit

One of the RISMAN project goals which is financed by the Erasmus plus program is to raise awareness of the importance of the "risk manager" profile in the field of fishing and aquaculture, as a future profile for the labor market, especially in the Western Balkan countries. The composition of the partners consortium of this project is a very good initiative to prove the continuity and stability of its results for more than the term of its completion. This is because every achieved objective has followed the line that developed countries pass on the experience and the most advanced methodology precisely to partner countries that are developing. Assessed by researchers in the field of fishing, marine, aquaculture and other studies, raising a new job profile for a market requires a lot of investment, human and logistical capacities, cooperation of educational and management institutions, as well as successful experiences of other countries.

It seems that the concept of risk finds itself in the fishing sector as one of the sectors with high fluctuation influenced by both internal and external factors. Therefore, continuous efforts have been made to measure, evaluate, manage the risk in the field of fishing, aquaculture and not only. In this short paper, the authors present through a descriptive analysis based on a literature review,

Project RISKMAN i finansuar nga Programi Erasmus+ CBHE ka përmbyllur me sukses Konferencën finale, në † Kampusin e Muğla Sitki Koçman University , Turqi

Konferenca u zhvillua më 12-16 Shkator 2022.

Kolegi Universitar i Biznesit si një nga partnerët konstribues në RISKMAN përfaquesur nga përfaqueset e caktuara të Projekteve qe krijuar gjatë Kolegut Universitar i Biznesit.

Qëndruesisht fokus kryesor pati dhe diskutimi mbi ekosistemet e zhvillimit të llojeve të ndryshme të specieve ku indikator kryesor ishtë temperatura e ujave as ku mundon të jetojnë, kërcënimi nga speciet e tjera që mëqekësia ti sulmohen si dhe specie të tjera të cilat janë më zhduke.

• Një tjetër aspekt shumë i rëndësishëm që po nifikon më speciet llore ishtë edhe ngroha globale e cilës po introhen në mënyrë shumë të shpejtë shumë ekosisteme të specieve që lidhët me njëra tjetrën.

✓ Takimi nga shtir i projektit i dia mundoshë që të gjithë partnerët ndajnë rezultatet e tyre, të diskutojnë mbi rezultatet e projektit dhe mës të gjitha të vijojnë të mbajnë këtë network të kujtar me dyshja përgjatë përgjithshme.

TERMINOLOGY IS THE FIRST THING TO DEFINE

Non-native (Alien) species are those that do not belong to a certain ecosystem. Opposite to them, **native** ones are those that belong there.

SOME EXAMPLES

Lionfish (*Pterois miles*) is native to the Indian ocean and has inhabited the Mediterranean through Suez channel.

European perch (*Perca fluviatilis*) inhabits different waterbodies in Europe. However, it is not native to western Balkan and it is introduced by humans.

Rapa Whelk (*Uliva maxima*) is a gastropod native to Northeast Pacific. It is introduced in the Mediterranean, likely by ships.

Aliens are divided into:

Exotic, those that do not harm the ecosystem
Invasive, those that are harmful for the ecosystem

WHAT YOU CAN DO?

Early detection of an non-native species is the most important in order to create the most appropriate answer!

At the beginning of an invasion, non-native species are often present in small numbers, so it is hard to detect them without participation of wider community.

If you are a fisher, diver, naturalist, or any other person who is in contact with nature, please send us your unusual or strange catches and sightings.

CONTACT INFORMATION:
Facebook: <https://www.facebook.com/riskman.albania/>
e-mail: riskman@alma-mail.com

Please scan the QR code and fill the questionnaire to help us in detection of alien species.

University College of Business together with the Albanian Center for Environmental Protection and Sustainable Development, Agricultural University of Tirana and Al-Adriano2013 shpk are partners in the RiskMan project, which includes not only organizations from the Balkans, but also Turkey and Italy.

All activities of this project are related to better knowledge of biology and ecology of non-native species in the Balkan area. Non-native species are divided into exotic and invasive, of which invasive are those that do damage to the ecosystem into which they have entered. Early detection of those invasions is our main goal for a timely response.

Projekti RISKMAN

Kolegji Universitar i Biznesit si pjesë e Projektit "Educational Capacity Strengthening for Risk Management of

Kolegji Universitar i Biznesit është pjesë e Projektit "Educational Capacity Strengthening for Risk Management of Non-native Aquatic Species in Western Balkans - RISKMAN" të bashku me 12 partnerë të tij nga Ballkan Perëndimor dhe Bashkimit Europian, vyon të ndjekë me sukses zbatimin e vjet të dytë të tij.

Ky projekt mbështetet nga programi i Bashkimit Europian Erasmus + CBHE 2020. Qëllimi i kryesor i projektit është të promovojë edukimin e palëve të interesuarë dhe arsimin e lartë, në fushën e Vlerësimit të rezultatit të specieve invaduese dhe të stimulujë kërkimin e bashkëpunimit në menaxhimin e specieve invaduese në Rajonin e Ballkanit Perëndimor.

Përgjate vitit 2022 në takimet e realizuara ndiemjet partnerëve (online dhe fizikisht) fokus i zbatimit të tij ka qenë kryesish:

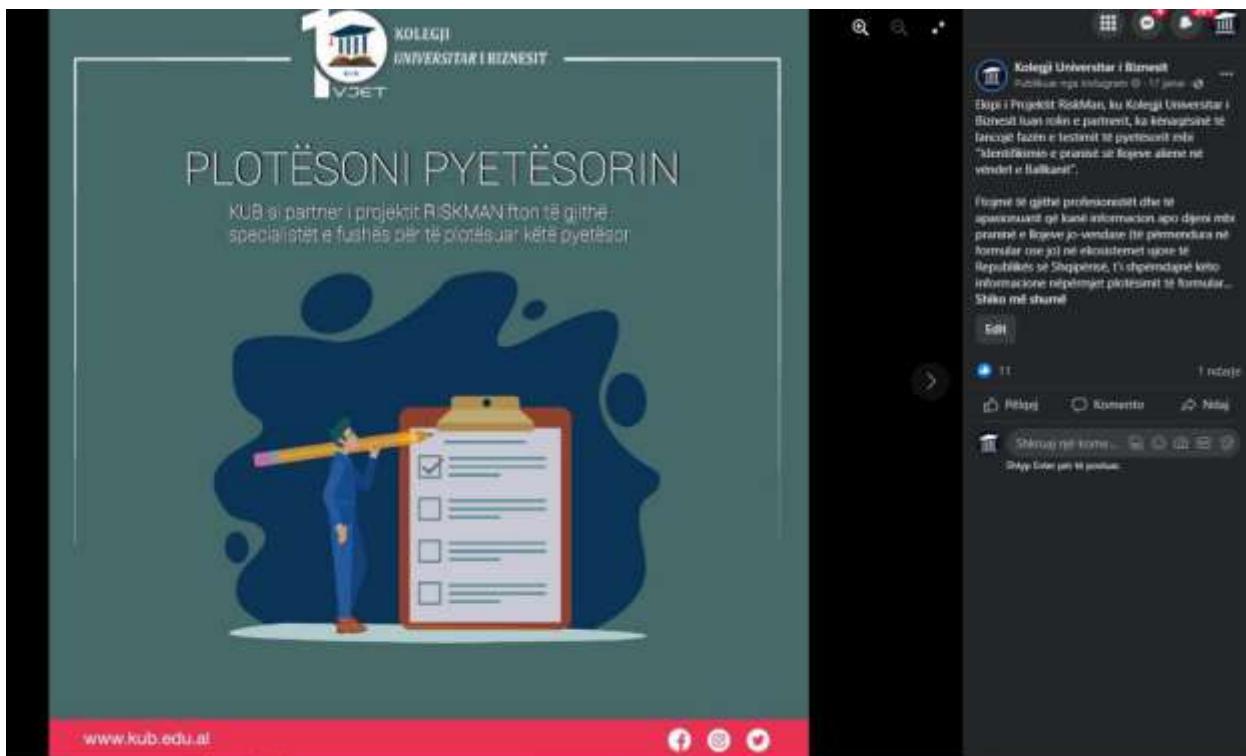

Zbulimi i rje-kurri të përshtatur për të njëjtë e papunë – ndërmjet përgjithses dhe zhvillimit të materialave të kursit të përshtatur në përpjekje me natyrën e projektit; të organizimit të trajnimeve me vendet partnerë të projektit; harqimi i komitizës së politikave përkujtime e profesionit të ri si "Menaxheri i Riskeut".

Kontroll / ciliçezë – me qëllim menaxhimin efektiv të projektit dhe kryerjen në kohë e me efektivitet të aktivitetave që janë planifikuar në projekt. Për zbatimin e kësaj pakete punë është ngjitur Komiteti i Ciliçezës.

Aktivitetet e shpërndarjes së veprimitarive të projektit – në të cilën janë angazhuar individualistë të gjithë partnerët. Roll i kësaj pakete punë është të llojë projektin me aktorët kryesorë, të angazhojë shqiprimë, të marrë ndërte gjykimin e publikut dhe të mosi praktikat e kapaciteteve të arsimit të lartë drejt ngjë komuniteti të shkolluar mbi specie non-native. Gjithashtu të përgatish dhe shpërndajë të gjitha produkte e projektit.

RiskMan Project

This project is supported by the European Union program Erasmus + CBHE 2020.

The main goal of the project is to promote the education of interested parties and higher education, in the field of risk assessment of non-native species and to stimulate research and cooperation in the management of non-native species in the Western Balkans Region.

Throughout 2022, in the meetings held between partners (online and physically), the focus of its implementation has been mainly:

Development of an adapted course for unemployed youth – through the preparation and development of course materials adapted to the nature of the project; the organization of trainings with the partner countries of the project; the drafting of the policy framework for the creation of a new profession such as "Risk Manager".

Quality control – with the aim of effective project management and timely and effective performance of the activities planned in the project. A Quality Committee has been established for the implementation of this work package.

Distribution activities of project activities – in which all partners are individually engaged. The role of this work package is to connect the project with key stakeholders, engage society, raise public awareness and promote higher education capacity practices towards an educated community on non-native species. Also prepare and distribute all project products.

Description

The University College of Business is a partner of the consortium of 13 winning partners of the Joint Project "Educational Capacity Strengthening for Risk Management of Non-native Aquatic Species In Western Balkans (Albania, Bosnia and Herzegovina and Montenegro) / RiskMan".

Funding: European Union funds

Implementation period: 2 years (15/11/2020 – 15/11/22)

Field of action: Capacity Building in Higher Education (CBHE), Erasmus Plus

Category: Winner

This project has been implemented since November 15, 2020.
